E-Service Book

The Toyota/Lexus Electronic Service Book (E-Service Book) is the result of the Toyota philosophy of continual innovation, and our quest to improve the ownership experience for every Toyota/Lexus driver.

- * The E-Service Book replaces the vehicle's traditional paper-based log book by a digital version, which will be held safely on a computer by Toyota/Lexus.
- * Every vehicle has its own file and can be accessed using the Vehicle Identification Number (VIN) by a Toyota/Lexus Authorised Repairer or by an Independent Repairer chosen by the vehicle's owner.
- * The repairer must update the vehicle's file every time maintenance is carried out and must provide the vehicle's owner with an up-to-date printout for reference purposes.
- * Different printouts will be provided for maintenance and accessory upgrades.
- * This E-Service Book applies to new and second-hand vehicles of Toyota and Lexus brands sold in Europe.
